C. U. S. Military Assistance Commitments. The U. S. has agreed to deploy one squadron of IREMs (JUPITER) to Turkey.

D. Description of Grant Military Assistance Programs. The FY 1950-60 programs included the following major categories of assistance:

	Value (In \$ Millions)
Aircraft, Components, Spares & Related Equipment	260
Ships and Harbor Craft, Components & Spares	100
Tanks, Other Vehicles, Weapons, Components & Spares	490
Ammunition	280
Guided Missile Systems, Components & Spares	60
Electronic & Communications Equipment, Components & Spares	120
Construction	30
Other Materiel (i.e., Civilian-Type Consumables)	260
Training	40

E. Cost-Sharing Programs. During the FY 1950-59 period, expenditures in Turkey under the NATO Infrastructure program were approximately \$85 million; expenditures under the Facilities Assistance (Weapons Production) Program amounted to approximately \$2 million.

F. Mutual Security Military Sales. Turkish purchases under the Mutual Security Military Sales Program amounted to approximately \$100,000 through the end of FY 1959.

G. Expenditure Trends. The maintenance and orderly modernization of Turkish forces required military assistance expenditures averaging approximately \$200 million per year during the period FY 1953 through FY 1959. Due to the reduced availability of military assistance funds and increased demands for military assistance in other areas of the world, expenditures dropped to approximately \$100 million in FY 1960. Expenditures are expected to remain at this level during FY 1961, rising toward the old level thereafter.

H. Anticipated Development. The figures in Tables I and II are based on the assumption that there will be no major revisions with respect to the Turkish force structure. If the forces are to be effectively maintained and modernized, it will be necessary to maintain future expenditures as described in paragraph G.
